

Introducing the Kenai Intentional Neighborhood

A project of Hope Community Resources

Many parents with children experiencing disabilities share a common concern...."what will happen to my son or daughter when I am gone?" Safety and security for children is important for all of us. Have you considered the importance of a supportive community as an answer to this question?

Five single-family homes and one tri-plex are currently under construction on 20 acres of property just outside of Sterling. The neighborhood will provide not only housing, but a way of life that incorporates the desires of families seeking to create a supportive neighborhood around their children.

Construction of homes will be completed by spring of 2018. There are currently two openings still available within this neighborhood. If you think the intentional neighborhood is one that your family member would be interested in, please contact our New Services Team at 907-433-4897.
